

The **APU clip-on profile UNO** is used horizontally in compound heat insulation systems e.g., for plaster joints up against shutter boxes or in the base area. The straight profile contour provides a reliable solution in respect of downward guidance of water.

The profile has a punched plaster bar. Welded onto the plaster limb is a fabric strip. Each bar has a fabric overhang on one side of 10cm in the lengthways direction. The bottom U-bar is used for perfectly fitting attachment to the existing structural element. The included plug connectors (Z13) and inner and outer corners (Z18-1) enable the profiles to be joined and fitted very precisely.

What is created after completion of the plastering work is a clean termination of the plaster.

Design

	ITEM NO.	LENGTH	PACKAGING UNIT	WEIGHT (per PU)
UNO clip-on profile				
W62-1 With straight drip edge and 12.5 cm mesh	W62-1-2100	2.1 m	10 bars = 21 m	4.0 kg

Features

	UNO CLIP-ON PROFILE
Material	Rigid PVC manufactured under DIN-16941
Mesh	 Min. 160 g/m² approved for compound heat insulation systems 12.5 cm wide - MW 4x4mm Ultrasonic welded
Accessories	 Z13-0000 Plug connectors (1 bag) Z18-1-1010i Internal corners (2 pieces) Z18-1-1010a External corners (4 pieces)

Important information

Storage	Always store profiles laid down in a dry place.
Other applications	Any applications not clearly described in the documents may be implemented only after consultation with the plaster or ETICS manufacturer.
